*Piecemaker*TM

The *Piecemaker*™ Series

Designed for use on both smaller blocks and larger acreage, the Piecemaker has you covered!

With its all metal construction the Piecemaker is compact in design yet powerful on performance. It recycles all garden waste materials with ease, and makes light work of all fibrous materials like palm fronds!

The patented anti-clog debris system ensures all waste is ejected into the catcher. Turn a large pile of waste into valuable recycled mulch.

All models come standard with our no mess catching system for easy mulch delivery and minimal clean up.
